

FGX SepTech's New Website is Now LIVE!

Our fully redesigned website, www.fgxseptechnology.com, is now live! Besides a fresh look it is also optimized for mobile devices and tablets so you access it on any device. Our online [Information Library](#) is a great resource for learning more about FGX technology. Be sure to follow our [blog](#) to stay up to date with the latest company news and events!

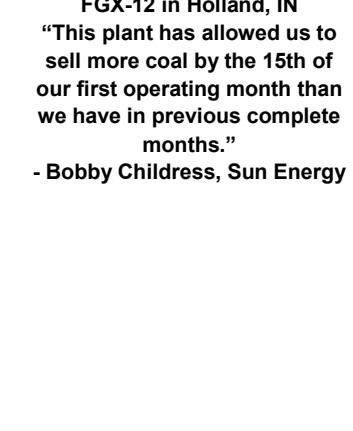

FGX Now Offers BOO and BOM Financing Options

With the current state of the industry, FGX knows that times are tough and has been creative in coming up with new avenues to work with you to finance your FGX plant. FGX now offers Build/Own/Operate and Build/Own/Maintain options*, along side our option to Rent, to eliminate the large capital outlay and risk for coal producers.

- **Rent**— either a fixed monthly rate or a per ton fee. Lease to Own is also available.
- **BOO**— build, own, operate. Let FGX do it for you!
- **BOM**— build, own, maintain. FGX will build it; you operate and maintain it for a monthly fee.

We know FGX technology is the leader in dry coal processing and that is why we are willing to stand behind our product to help eliminate the risk involved in erecting a plant. Savings realized by implementing an FGX plant in lieu of a wet plant to upgrade the quality of your coal will make a great impact on your bottom line. Don't hesitate—call us today to see how we can help you!

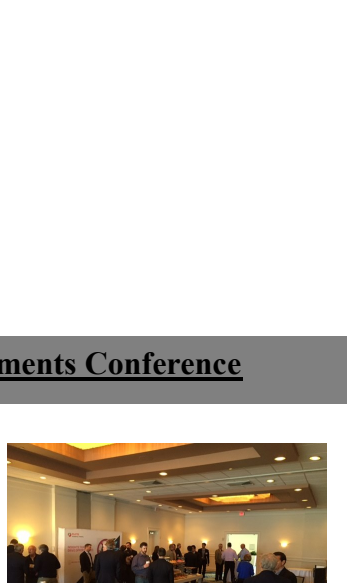

*Upon meeting certain criteria, available for U.S. only.

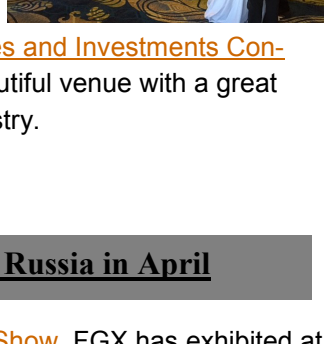

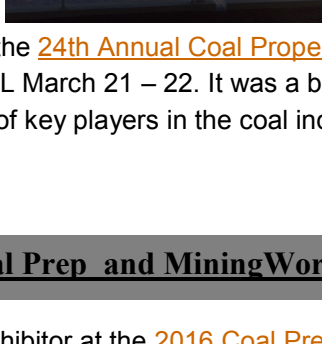

FGX-12 in Holland, IN

“This plant has allowed us to sell more coal by the 15th of our first operating month than we have in previous complete months.”

- Bobby Childress, Sun Energy

FGX Exhibits at Platts Coal Properties and Investments Conference

FGX SepTech exhibited at the [24th Annual Coal Properties and Investments Conference](#) in Ft Lauderdale, FL March 21 – 22. It was a beautiful venue with a great crowd of key players in the coal industry.

FGX is Ready for Coal Prep and MiningWorld Russia in April

FGX is excited to be an exhibitor at the [2016 Coal Prep Show](#). FGX has exhibited at Coal Prep for several years as it is the only annual tradeshow dedicated to coal preparation and processing. This year the show will be held in Louisville, KY April 25th—27th. Come see us at Booth #941!

FGX will also be exhibiting at [MiningWorld Russia](#) for the first time this year. The show is held in Moscow, Russia April 26th—28th. We are excited for the opportunity to meet clients from the Russian market.

FGX Testing Schedule Ramped Up

FGX SepTech has continued testing a wide variety of coal from different regions in the United States and different countries. Last month we tested coal from a large lignite mine in Texas, graphite coal from Mexico, and a large refuse pile in Virginia. Testing is available at our headquarters in Lexington, KY with others being held on the mine site with our mobile testing unit (pictured below). If you are interested in having your coal tested with FGX contact us today!

FGX Exhibits at Platts Coal Properties and Investments Conference

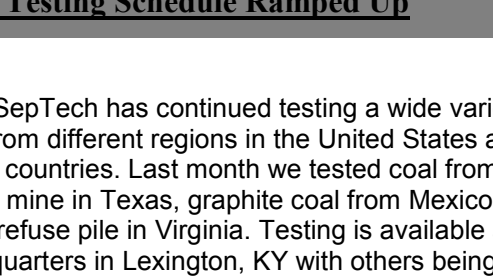

FGX SepTech exhibited at the [24th Annual Coal Properties and Investments Conference](#) in Ft Lauderdale, FL March 21 – 22. It was a beautiful venue with a great crowd of key players in the coal industry.

FGX is Ready for Coal Prep and MiningWorld Russia in April

FGX is excited to be an exhibitor at the [2016 Coal Prep Show](#). FGX has exhibited at Coal Prep for several years as it is the only annual tradeshow dedicated to coal preparation and processing. This year the show will be held in Louisville, KY April 25th—27th. Come see us at Booth #941!

FGX will also be exhibiting at [MiningWorld Russia](#) for the first time this year. The show is held in Moscow, Russia April 26th—28th. We are excited for the opportunity to meet clients from the Russian market.

The FGX booth at the 2015 Coal Prep Show.

FGX Testing Schedule Ramped Up

FGX SepTech has continued testing a wide variety of coal from different regions in the United States and different countries. Last month we tested coal from a large lignite mine in Texas, graphite coal from Mexico, and a large refuse pile in Virginia. Testing is available at our headquarters in Lexington, KY with others being held on the mine site with our mobile testing unit (pictured below). If you are interested in having your coal tested with FGX contact us today!

FGX SepTech's New Website is Now LIVE!

Our fully redesigned website, www.fgxseptechnology.com, is now live! Besides a fresh look it is also optimized for mobile devices and tablets so you access it on any device. Our online [Information Library](#) is a great resource for learning more about FGX technology. Be sure to follow our [blog](#) to stay up to date with the latest company news and events!

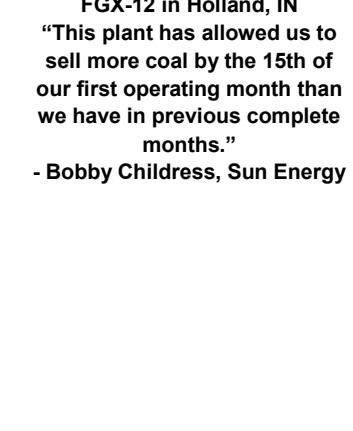

FGX Now Offers BOO and BOM Financing Options

With the current state of the industry, FGX knows that times are tough and has been creative in coming up with new avenues to work with you to finance your FGX plant. FGX now offers Build/Own/Operate and Build/Own/Maintain options*, along side our option to Rent, to eliminate the large capital outlay and risk for coal producers.

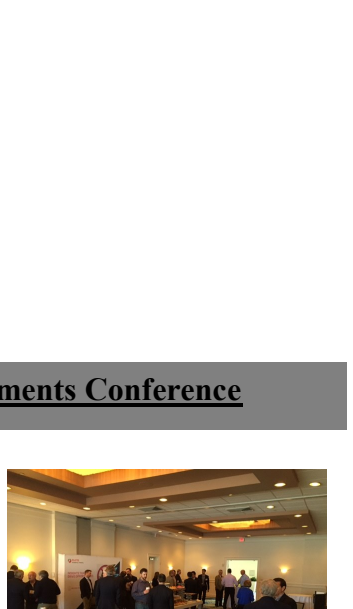

- **Rent**— either a fixed monthly rate or a per ton fee. Lease to Own is also available.
- **BOO**— build, own, operate. Let FGX do it for you!
- **BOM**— build, own, maintain. FGX will build it; you operate and maintain it for a monthly fee.

We know FGX technology is the leader in dry coal processing and that is why we are willing to stand behind our product to help eliminate the risk involved in erecting a plant. Savings realized by implementing an FGX plant in lieu of a wet plant to upgrade the quality of your coal will make a great impact on your bottom line. Don't hesitate—call us today to see how we can help you!

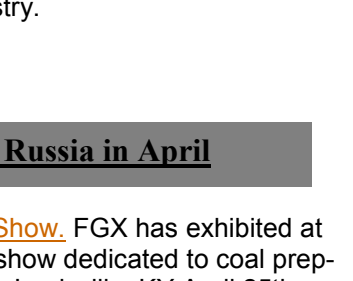

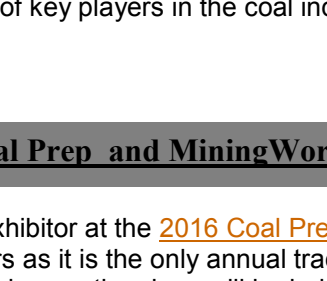

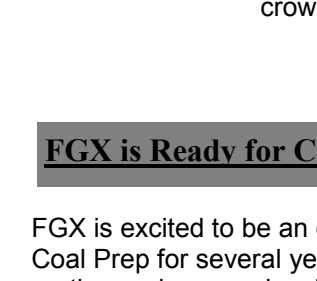

*Upon meeting certain criteria, available for U.S. only.

FGX SepTech's New Website is Now LIVE!

Our fully redesigned website, www.fgxseptechnology.com, is now live! Besides a fresh look it is also optimized for mobile devices and tablets so you access it on any device. Our online [Information Library](#) is a great resource for learning more about FGX technology. Be sure to follow our [blog](#) to stay up to date with the latest company news and events!

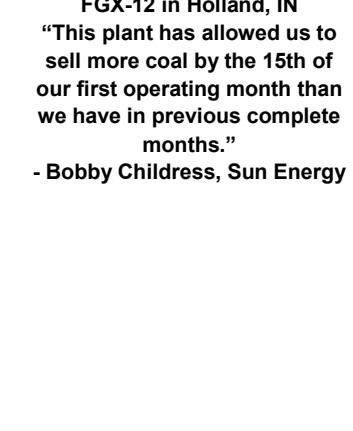

FGX Now Offers BOO and BOM Financing Options

With the current state of the industry, FGX knows that times are tough and has been creative in coming up with new avenues to work with you to finance your FGX plant. FGX now offers Build/Own/Operate and Build/Own/Maintain options*, along side our option to Rent, to eliminate the large capital outlay and risk for coal producers.

- **Rent**— either a fixed monthly rate or a per ton fee. Lease to Own is also available.
- **BOO**— build, own, operate. Let FGX do it for you!
- **BOM**— build, own, maintain. FGX will build it; you operate and maintain it for a monthly fee.

We know FGX technology is the leader in dry coal processing and that is why we are willing to stand behind our product to help eliminate the risk involved in erecting a plant. Savings realized by implementing an FGX plant in lieu of a wet plant to upgrade the quality of your coal will make a great impact on your bottom line. Don't hesitate—call us today to see how we can help you!

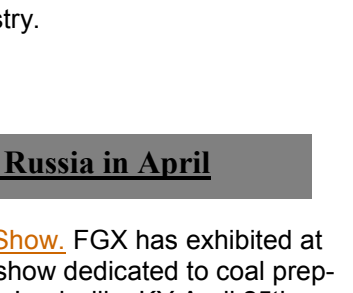

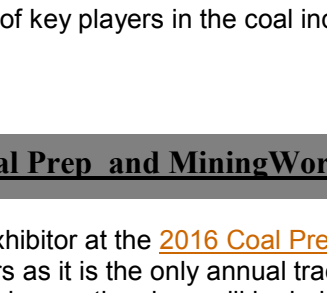

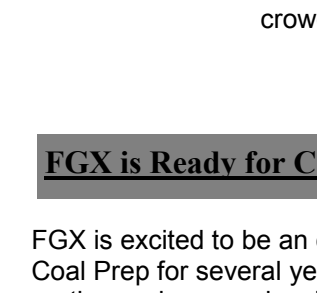

*Upon meeting certain criteria, available for U.S. only.

FGX-12 in Holland, IN
“This plant has allowed us to sell more coal by the 15th of our first operating month than we have in previous complete months.”
- Bobby Childress, Sun Energy

FGX Exhibits at Platts Coal Properties and Investments Conference

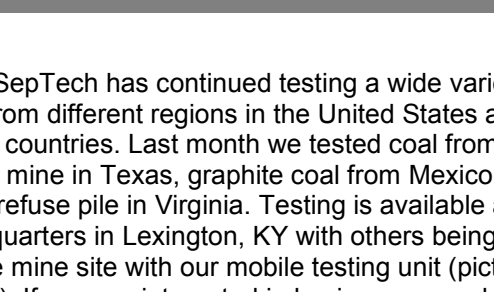

FGX SepTech exhibited at the [24th Annual Coal Properties and Investments Conference](#) in Ft Lauderdale, FL March 21 – 22. It was a beautiful venue with a great crowd of key players in the coal industry.

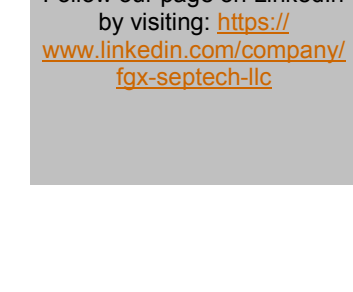

FGX is Ready for Coal Prep and MiningWorld Russia in April

FGX is excited to be an exhibitor at the [2016 Coal Prep Show](#). FGX has exhibited at Coal Prep for several years as it is the only annual tradeshow dedicated to coal preparation and processing. This year the show will be held in Louisville, KY April 25th—27th. Come see us at Booth #941!

FGX will also be exhibiting at [MiningWorld Russia](#) for the first time this year. The show is held in Moscow, Russia April 26th—28th. We are excited for the opportunity to meet clients from the Russian market.

FGX Testing Schedule Ramped Up

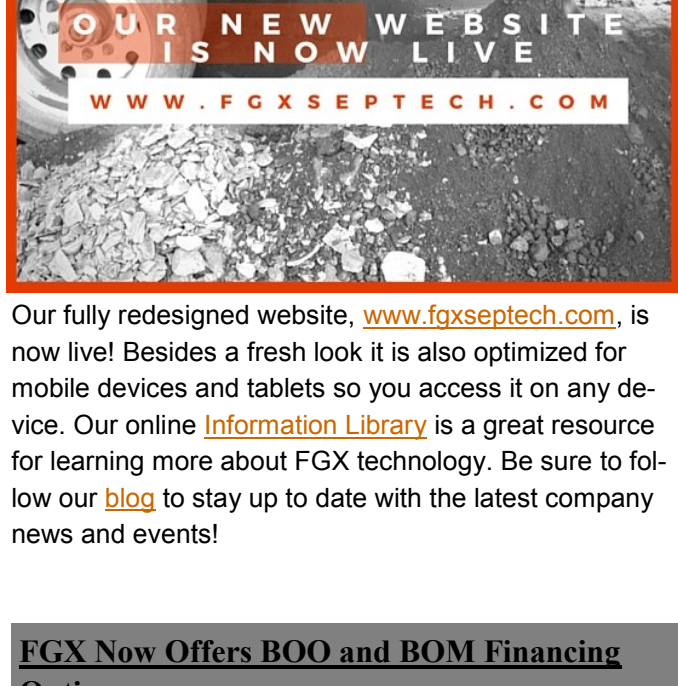

FGX SepTech has continued testing a wide variety of coal from different regions in the United States and different countries. Last month we tested coal from a large lignite mine in Texas, graphite coal from Mexico, and a large refuse pile in Virginia. Testing is available at our headquarters in Lexington, KY with others being held on the mine site with our mobile testing unit (pictured below). If you are interested in having your coal tested with FGX contact us today!
