

## CASE STUDY:

# EAGLE RIVER COAL COMPANY

HARRISBUG, IL

“The FGX plant has worked great for us for the past 4 years. The plant does a excellent job removing ash and sulfur from our raw feed. We see 15% - 18% ash reduced to 8% - 9% ash on our clean product, with sulfur reduction around 1.5%. We are extremely pleased with the performance of our FGX 24A plant and the support we get from the FGX crew.”

-Joey Pilcher, Eagle River Coal Co.

## A Typical Analysis:

### Before FGX:

Ash Content 16% on average  
Sulfur Content 6% on average

### After FGX:

Ash 8% - 9% on average  
Sulfur 4% - 4.5% on average
